WORK EXPERIENCE

Google Speech Recognition Group

Research Scientist

I am a member of the audio-visual speech recognition group, working on research to better transcribe and summarize video meetings.

New York, NY

Oct. 2020 -

Google Research – Large Scale Machine Learning Research Group

Research Intern

Worked on model compression, a research area which attempts to train more compact models in the case where larger more powerful models already exist. Performed experiments using Torch.

New York, NY

Summer 2015

Microsoft Research – Speech and Dialogue Research Group

Research Intern

Worked on training acoustic models from the raw speech signal. Specifically, was interested in seeing whether it was possible to train the matrices which perform the Fourier transform and mel-binning, as part of the classical MFCC feature extraction pipeline. Performed extensive experiments with, and made large improvements to, the Computational Network Toolkit (CNTK), an open-source C++ machine learning toolkit developed by MSR.

Redmond, WA

Summer 2014

Microsoft Corporation – Windows Communication Foundation (WCF)

Software Development Engineer

Developer on the Messaging Framework Team. Designed and implemented features to facilitate the development of distributed applications.

Honors: Received “Gold Star Bonus Award” for contributions to team.

Redmond, WA

Aug. 2009 - July 2011

Microsoft Corporation – Windows Workflow Foundation (WF)

Software Development Engineer Intern

Designed and implemented program for validating Windows Workflow programs. Integrated it with Microsoft Visual Studio.

Redmond, WA

Summer 2008

Harvard University – Mathematics Department

Course Assistant for Math 23b: Linear Algebra and Real Analysis II

Led weekly review of material covered in class. Held weekly office hours.

Honors: Awarded “Certificate of Distinction in Teaching” based on student evaluations.

Cambridge, MA

Spring 2008

University of Maryland – Granular Physics Lab

Research Assistant

Conducted research in granular physics with Professor Wolfgang Losert. Studied the propagation of avalanches in excitable media using the tools of image processing. Programmed extensively in IDL (interactive data language).

College Park, MD

Summer 2007

The Inter-American Development Bank (IDB)

Knowledge Intern

Worked as part of a team in the Development Effectiveness and Strategic Planning Department to revamp IDB’s Project Alert Identification System (PAIS). Created a strategic proposal with recommendations for improving this system.

Washington, DC

Summer 2006
